

# Light Vehicle Production Forecast

## Contingency Forecasts

It is the unforeseen market highs and lows that threaten the stability and profitability of your business. IHS Automotive Light Vehicle Production Contingency Forecasts help you prepare for the possible—both the opportunities and the obstacles—by delivering detailed sensitivity analysis on IHS Automotive's baseline production forecasts.

### Prepare for the unexpected

Strategic planners use the IHS Automotive Light Vehicle Production Contingency Forecasts to understand and plan for the impact of potential macroeconomic, industry, and environmental scenarios. The module helps:

Our automotive and macroeconomic experts provide you with high- and low-band sensitivity forecast scenarios for key industry drivers—from natural disasters and oil prices, to trade deficits and GDP growth—that could bolster or impair the global automotive market and your piece of it.

#### Suppliers

- Consider alternative revenue and margin forecasts
- Formulate contingencies for capacity planning and capital allocation
- Establish market volume thresholds for business case evaluation/approval

#### OEMs

- Evaluate competitors' capacity constraints
- Assess need for additional capacity

#### Financial institutions

- Assess various OEM future production/revenue implications
- Analyze auto supplier book-of-business/turnaround analysis

#### Government agencies

- Formulate plans for economic development
- Assess domestic automotive sector output and employment

#### Understand the potential impact

If oil prices jump, some markets will slide while a few may reap benefits. The production contingency forecasts shows how the output of a particular name plate vehicle would change, wherever its produced in the world.

Global Light Vehicle Production: Alternative Forecast Contingency Ranges

## In-depth coverage meets forward-looking analysis

An essential companion to our Light Vehicle Production Forecast—which covers more than 50 countries, 600 plants, and 2,300 models over a 7-year forecast horizon—the IHS Automotive Light Vehicle Production Contingency Forecasts help you understand what could happen and what you can do to prepare.

Subscribers to the service receive:

- Two alternative model-level forecasts with the same 30-plus detailed fields as the base production forecast, which range from global/regional segmentation to plant and nameplate volume
- Narrative describing alternative economic/demand conditions and high-level effects on regions and their segments
- Delta calculations for analysis of regions, OEMs, vehicles, and plant changes compared with the core production forecast

Contingency Forecasts are updated quarterly. Data are delivered in monthly buckets for history, current year and two forecast years; quarterly for the rest of the base horizon buckets.

### Get a complete picture of the industry

In addition to the Light Vehicle Production Contingency Forecasts, IHS Automotive offers a full range of other optional, add-on modules and a separate 25-year Automotive Long-Term Planning and Scenarios product that expand the depth and detail of our base Light Vehicle Production Forecast.
